Flow chart "Extension of scope of methods "

Step 1

Compare new formulation to those tested in the initial trial

CIPAC method available for the formulation?

- yes

- no

Step 2

Check concentration

Concentration inside the ranges?

- yes

- no

Step 3

Perform specificity test

Within acceptable range?

- yes

- no

Step 4

Modify method

Minor change?

- yes

- no

Step 5

Perform repeatability test

Is repeatability in the normal range as initial trial?

- yes

- no

Step 6

Full scale study

Step 7

Present results to CIPAC
