CIPAC INFORMATION SHEET No. 250

Your Ref:
Our Ref: LB
10 August 2004

654. pyraclostrobin

This is to inform you that DAPA/BASF is planning to organize a collaborative trial on a method for pyraclostrobin.

Principle. The pyraclostrobin content is determined by reversed-phase HPLC using a 25 cm x 4.6 mm (i.d), Zorbax Eclipse XDB C18 column (particle size 5 µm), or equivalent with the same selectivity, mobile phase composed of acetonitrile/water/acetic acid, 750/250/1 (v/v/v) and UV detection at 275 nm. Quantification is done by external standardization.

Scope. It is intended to analyze five samples consisting of two technicals, one TK, EC and WG formulations. Samples and pyraclostrobin analytical standard will be supplied.

Time schedule. The collaborative trial is intended to be carried out during September 2004 – November 2004.

Those who wish to participate should contact the organizer by 15th September 2004.
