CIPAC INFORMATION SHEET No. 263

Your Ref:
Our Ref: LB
6 December 2005

26. carbaryl

Dear Member,

This is to inform you that DAPA/Bayer Industry Services is planning to organize a collaborative trial on a method for carbaryl.

Principle: The content of carbaryl is determined by reversed phase HPLC using a 250 x 4 mm Nucleosil RP 18 column (or equivalent), eluent water/acetonitrile 55 / 45 v/v, a column rinsing gradient and UV detection at 280 nm. Quantification is done by external standardization.

Scope: It is intended to analyse the technical concentrate and WP and SC formulations (5 samples). Carbaryl analytical standard will be supplied.

Time schedule: The collaborative work is intended to be carried out during March/April 2006 (shipment in January). Those who wish to participate should contact the organizer by 23rd December 2005.

Contact:

Dr. Tilmann Werner
Bayer Industry Services GmbH & Co.
SUA-PUA 2
Chemiepark Dormagen, Gebäude Da 5
41538 Dormagen
Germany
