585. fosthiazate

This is to inform you that ISK Biosciences Europe N.V. is planning to organize a collaborative trial on a method for fosthiazate.

Principle: The content of fosthiazate is determined by reversed phase high performance liquid chromatography on a Hypersil ODS C18 column, 125 mm x 4 mm (i. d.), 5 µm, or equivalent, with mobile phase composed of acetonitrile and acetonitrile/water (1/2 v/v) and UV detection at 220 nm. Quantification is done by internal standardization (dimethyl phthalate).

Scope: It is intended to analyze five samples consisting of three technical materials and two GR formulations. Samples, analytical standard and internal standard will be supplied.

Time schedule: The collaborative trial is intended to be carried out during January – March 2012. Those who wish to participate should contact the organizer by 5th December 2011.

Contact:

Frédéric Joris
ISK Biosciences Europe N.V.
Pegasus Park
De Kleetlaan 12B, box 9
