## CIPAC INFORMATION SHEET No. 336

Your Ref: Our Ref: LB October 2022

## 414 S-methoprene

Dear Colleague,

This is to inform you that Shenyang SYRICI Testing Co. LTD is planning to organise a full scale collaborative trial on a method for S-methoprene.

**Principle**: The content of S-methoprene is determined by normal phase high performance liquid chromatography on a 250 x 4.6 mm (i.d.) Chiralpak AD-H silica column (or equivalent, with the same selectivity) using mobile phase composed of *n*-hexane/2-propanol, (100/0.5; v/v), with detection at 254 nm (in combination with CIPAC 414/TC/(M)/-, section 3). Quantitation is done by external standard calibration.

**Scope:** It is intended to analyse 3 samples composed of three technical materials (TC). Samples and analytical standard will be provided.

**Time schedule:** The collaborative trial is intended to be carried out between January  $2023 - 31^{st}$  March 2023. Those who wish to participate should contact the organizer by  $30^{th}$  November 2022. The results should be reported by the end of March 2023.

**Note**: The trial is limited to 20 participating laboratories due to the availability of samples. The selection is based on the application order.

## **Contact:**

Ms. Song Junhua/Ms. Hou Chunqing 8 Shenliao Road Tiexi District, Shenyang Niaoning 110021, China

Yours sincerely,

Tel.: +86-24 85869045 E-mail: songjunhua@sinochem.com houchunqing@sinochem.com
