### CIPAC INFORMATION SHEET No. 358

Your Ref:  
Our Ref: LB  
September 2025

#### 999 pydiflumetofen

Dear Colleague,

This is to inform you that Syngenta Crop Protection AG is planning to organise a full-scale collaborative trial on a method for pydiflumetofen.

**Principle:** The content of pydiflumetofen in the formulations is determined by high performance liquid chromatography on a Phenomenex Kinetex C18, 100 x 4.6 mm (i.d.), 2.6 µm particle size column (or equivalent with the same selectivity), with mobile phase composed of acetonitrile/water (0.1% v/v phosphoric acid) and UV detection at 230 nm. Quantitation is done by external standard calibration.

**Scope:** It is intended to analyse five samples consisting of one technical material (TC) and 4 formulated samples (2 SC and 2 EC samples). Samples and analytical standard will be provided.

**Time schedule:** The collaborative trial is intended to be carried out between November 2025 and March 2026. Those who wish to participate should contact the organiser by October 30<sup>th</sup>, 2025. The results should be reported by the end of March 2026.

**Note:** The trial is limited to 20 participating laboratories due to the availability of samples. The selection is based on the application order.

**Contact:**  
Mr Christian Mink  
Syngenta Crop Protection AG  
Breitenloh 5  
4333 Mülchwil  
Switzerland
