CIPAC INFORMATION SHEET No. 363

June 2026

1033 renofluthrin

Dear Colleague,

This is to inform you that Shogun Organics Ltd. is planning to organise a full scale collaborative trial on a method for renofluthrin.

Principle: The content of renofluthrin in the technical material is determined by gas chromatography on an HP-5, or equivalent, fused silica column, 30 m length, 0.25 mm i.d., 0.25 µm film thickness, using nitrogen as carrier gas and flame ionization detection. Quantitation is done by internal standard calibration.

Scope: It is intended to analyse 4 samples of renofluthrin technical materials (TC). Samples and analytical standards will be provided.

Time schedule: The collaborative trial is intended to be carried out between June 2026 and August 2026. Those who wish to participate should contact the organiser by 15th June. The results should be reported by the end of August 2026.

Contact:

Dr. Lutful Haque Khan
SHOGUN ORGANICS LIMITED
4th & 5th Floor, Block-A, NDM-1,
Netaji Subhash Place,
