CIPAC INFORMATION SHEET No. 249

Your Ref:
Our Ref: LB
10 August 2004

761. *d,d*-trans-cyphenothrin

This is to inform you that JAPAC is planning to organize a collaborative trial on a method for *d,d*-trans-cyphenothrin.

Principle. The content of *d,d*-trans-cyphenothrin is determined by capillary gas chromatography (column coated with crosslinked 50% phenyl 50% dimethyl polysiloxane, e.g. DB-17, 0.25 mm ID x 30 m, 0.25µm film thickness) using split injection, flame ionisation detection and 4-benzylbiphenyl as internal standard.

Scope. It is intended to analyze five samples consisting of two technicals and three emulsifiable concentrates. *d,d*-trans-cyphenothrin analytical standard will be supplied. Internal standard will be supplied on request.

Time schedule. The collaborative trial is intended to be carried out during October 2004 - January 2005.

Those who wish to participate should contact the organizer by 10th September 2004.
