### 338 Acephate

Dear Colleague,

This is to inform you that Rallis India Limited is planning to organise a full scale collaborative trial on a method for acephate.

**Principle:** The content of acephate in formulations is determined by reversed phase high performance liquid chromatography on a 250 x 4.6 mm (i.d.), 5 µm C18 column, with mobile phase composed of acetonitrile: water (10 mM KH<sub>2</sub>PO<sub>4</sub>) (40: 60 v/v) and UV detection at 225 nm. Quantitation is done by internal/external standardisation.

**Scope:** It is intended to analyse acephate technical samples and acephate SP and SG formulation samples. Samples, acephate analytical standard and phenacetin internal standard will be supplied.

**Time schedule:** The collaborative trial is intended to be carried out during February 2017- April 2017 (shipment in last week of February 2017). Those who wish to participate should contact the organiser by 25<sup>th</sup> February 2017. The results should be reported by the end of April 2017.
